CHRISTMAS TREE EMOTION PUPPET

1 Color and cut out your Christmas tree, ensuring that you leave a small white border around the edges.

2 Make two vertical cuts along the dotted lines of your Christmas tree for the emotion strokes.

3 Cut along the dotted lines (emotion strokes) and insert the paper stroke with emotions through the two cuts.

4 Pull the stroke slowly so that the emotions become visible. Optional: Glue your puppet to a popsicle stick so your child can hold it.

5 Enjoy, learn, giggle, and have lots of fun!
